

Mesmerizing Master Bath

Author: Pental | November 17, 2015 /**/

Designer Peg Christensen from Ash Pierce Design made this enchanting master bath possible by combining three smaller rooms, as well as claiming a few feet of space from the bedroom. French doors open up to an expansive floating double vanity with vessel sinks that sit atop a PentalQuartz countertop in Sandcastle. Glass tile cascades down the wall behind the matching oval mirrors, evoking the feel of a waterfall. This design is repeated both behind the freestanding bathtub, and in the shower where it combines with Moda Vetro glass tile in ES07 with a matte finish. The tile runs throughout the curbless shower, along the back wall, and extends into the room beyond. Warm color tones create an overall relaxing and spa-like atmosphere in this sublime space.
